HOW NOT TO BE KILLED BY OTHER DISEASES

# 👤 TOP CAUSES OF DEATH IN CHINA

🤔 How not to die from diseases like these?

Cause of Death	Avg. Annual Deaths (millions)
🧠 Cerebrovascular disease	2.4
❤️ Ischemic heart disease	2.2
🫁 COPD <sup>1</sup>	1.1
❤️ Hypertensive heart disease	1.0
🫁 Lung cancer	0.7
🍷 Liver cancer	0.5
👄 Stomach cancer	0.4

<sup>1</sup>Chronic obstructive pulmonary disease is a progressive lung disease that makes it hard to breathe.

# How NOT To DIE

Plant-based diets can help you not to die from

Lung diseases

Brain diseases

Digestive cancer

Infectious diseases

Diabetes

High blood pressure

Liver disease

Blood cancers

Kidney disease

Breast cancer

Depression

Prostate cancer

Parkinson's disease

Iatrogenic causes<sup>2</sup>

---

<sup>2</sup>Iatrogenic means illness or death caused by medical treatment itself.

## HOW NOT TO FROM LUNG DISEASE

Take a deep breath and imagine what it would be like to not be able to breathe.

## HOW NOT TO FROM LUNG DISEASE

Take a deep breath and imagine what it would be like to not be able to breathe.

The number two killer in  is lung disease, which claims 300 000 lives.

## HOW NOT TO FROM LUNG DISEASE

Take a deep breath and imagine what it would be like to not be able to breathe.

The number two killer in  is lung disease, which claims 300 000 lives.

The three types of lung disease which kill most are — lung cancer, COPD and asthma.

# GHG (GREEN HOUSE GAS) EMISSION

## Global greenhouse gas emissions from food production

Our World  
in Data

Data source: Joseph Poore & Thomas Nemecek (2018). Reducing food's environmental impacts through producers and consumers. Published in Science.

Licensed under CC-BY by the author Hannah Ritchie (Nov 2022).

GHG emissions from food production. Source: [Our World in Data](#)

## GHG (GREEN HOUSE GAS) EMISSION

The CO<sub>2</sub> emissions of beef are approximately 16 times that of tofu for the same amount of protein!

kg CO<sub>2</sub>-eq emissions per 100g protein

A plant-based diet can reduce as much as 75% of your CO<sub>2</sub> emission.

# 💧 WATER POLLUTION

💩 Livestock operations generate vast quantities of liquid manure.

😬 Storage lagoons sometimes overflow or leak, contaminating freshwater sources.

☠️ The 🦠 in this waste can make people sick, and the high level of nitrates can cause deadly algal bloom.

🇺🇸 In 2020, a farm in NC leaked an **estimated 3.7 million liters** of 🐷 manure into a nearby creek.

# 💧 WATER POLLUTION

💩 Livestock operations generate vast quantities of liquid manure.

😬 Storage lagoons sometimes overflow or leak, contaminating freshwater sources.

☠️ The 🦠 in this waste can make people sick, and the high level of nitrates can cause deadly algal bloom.

Southern Australia's toxic algal bloom covers 4500 km<sup>2</sup> of ocean and has killed **13 800** animals.

# ZOONOTIC DISEASES

Crowded animal farms near wildlife habitats can enable virus spillover.

Bats may contaminate feed or water, triggering infection chains.

Infected animals can pass deadly viruses to humans.

In 1998, an outbreak of Nipah virus struck Malaysia. Linked to  farms near  habitats, the virus led to the death of **over 100 people** and the culling of 1 million .

# ZOONOTIC DISEASES

🦠 Intensive poultry farming provides an ideal environment for bird flu virus such as H5N1 to mutate.

👨🏻‍🔬 If the virus gains the ability to transmit from human to human, then we have another pandemic!

🦠 Since H5N1 reached 🇺🇸 in 2022, over 148 millions birds have been culled.

# ANTIBIOTIC USE IN LIVESTOCK

😱 Antibiotics are frequently used in intensive animal farming.

🏠 This fuels the emergence and spread of antibiotic-resistant 🦠, or **superbugs**.

🦠 **MRSA CC398** — superbug that arose in intensively-reared 🐷 herds — now spreads to humans, even beyond farms.

HEALTH IS DEEPLY INTERTWINED  
WITH THE CLIMATE, THE AIR WE  
BREATHE, THE WATER WE DRINK,  
AND THE NATURAL ENVIRONMENT.

THE LESS 🐮🐷🐔 WE CONSUME,  
THE HEALTHIER OUR 🌍 BECOMES,  
AND THE HEALTHIER OUR BODIES  
BECOME.

## ? DISCUSSIONS

🤔 If a mostly plant-based diet can improve both our health and the planet's, what might hold you back from trying it?

## CALL TO ACTION
